

OEM Radiator Water Pipe Copper 25460-26000 For Hyundai Santa Fe 2015

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 25460-26000
- Minimum Order Quantity: 10 PCS
- Price: \$1.72 ~ \$2.73
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

Product Specification

- Temperature Rating: 150
- Brand: OEM
- Size: 1/2 Inch
- Material: Copper
- Application: Automotive
- Pressure Rating: 1.6MPa
- Name: Radiator Water Pipe
- Highlight: **OEM Radiator Water Pipe,**
Radiator Water Pipe Copper, 25460-26000

Product Description

25460-26000 High Quality Water Coolant Hose Water Pipe for Hyundai Santa Fe 2015 25460 26000

Product Description:

We are proud to present our high-quality Water Coolant Hose Water Pipe. It is a crucial part specially designed to carry coolant fluid throughout your car's cooling system. This water coolant hose water pipe is made with accuracy and robustness to guarantee ultimate performance and dependable cooling.

Features:

Our water coolant hose water pipe is superior in construction, which is crafted from high-quality materials, such as reinforced rubber or silicone, that are resistant to heat, pressure, and coolant chemicals. This ensures strength, flexibility, and long-lasting performance in demanding operating conditions.

The water coolant hose water pipe is responsible for circulating coolant fluid between the engine, radiator, heater core, and other cooling system components. This helps transfer the heat away from the engine, ensuring proper engine temperature regulation and preventing overheating.

Not only does this pipe feature reinforced layers and sturdy connectors, but it is also designed to withstand high pressures and temperature fluctuations, minimizing the risk of leaks or bursts. This ensures a secure and reliable connection, enhancing the overall integrity of the cooling system.

The water coolant hose water pipe is also engineered to withstand extreme temperature variations and exposure to coolant chemicals, resisting deterioration, swelling, and cracking, ensuring consistent coolant flow and preventing coolant contamination.

It is designed for straightforward installation, making it suitable for both professional mechanics and DIY enthusiasts and is a direct fit replacement for your vehicle's original water pipe, ensuring compatibility and a hassle-free installation process.

We understand the importance of quality assurance, which is why our water coolant hose water pipe undergoes rigorous testing and quality control measures to meet or exceed industry standards. It is manufactured by trusted suppliers who prioritize quality and performance, providing you with a reliable and durable product.

Support and Services:

For technical support and service for Radiator Water Pipe, please contact our customer service team.

We provide technical assistance, troubleshooting, repair, and maintenance services for our Radiator Water Pipe products. Our team is available 24 hours a day, 7 days a week, to help you with any issues you may have.

If you would like to request any of these services, please contact us at [email address] and one of our customer service team members will be in touch with you shortly.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specializing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+ years
