Wholesale 52710-3A100 Wheel Hub Bearing For Hyundai Trajet 2000-2008

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 52710-3A100
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Type: Wheel Hub Bearing
- Warranty: 12 Months
- Name: Automobile Spare Parts
- Country Of Origin: China
- Size: Standard
- Material: Steel

Product Description

Product Description:

A wheel hub bearing is a crucial part of the suspension system in a vehicle. It is commonly known as a hub assembly or wheel bearing assembly. The purpose of the hub assembly is to aid in the smooth and controlled rotation of each wheel, while also supporting the weight of the vehicle.

The hub assembly is located at each wheel and is subject to significant wear and tear. Over time, the hub assembly can become damaged, which can negatively impact the performance and safety of the vehicle. Therefore, it is important to regularly inspect and replace the hub assemblies as needed.

Without a properly functioning wheel hub bearing, a vehicle's handling and stability can be compromised, leading to dangerous driving situations. Additionally, a worn or damaged hub assembly can cause uneven tire wear and premature tire replacement, leading to increased maintenance costs.

Features:

- Smooth and Quiet Operation
- Our wheel hub bearing utilizes advanced bearing technology and precision engineering to provide smooth and quiet rotation of the wheel. It reduces friction and minimizes noise, allowing for a comfortable and enjoyable driving experience.
- High-Quality Materials
- We use premium-grade materials such as high-quality steel and durable seals in the construction of our wheel hub bearing. These materials are designed to withstand heavy loads, extreme temperatures, and harsh driving conditions, ensuring long-lasting performance and reliability.
- Integrated Design
- Our wheel hub bearing features an integrated design that combines the wheel bearing, hub, and ABS (Anti-lock Braking System) sensor into a single unit. This integration simplifies installation and ensures proper alignment and functionality of the ABS system, contributing to safe and efficient braking performance.
- Enhanced Safety
- Our wheel hub bearing plays a critical role in the safety of your vehicle. It supports the weight of the vehicle and provides a secure attachment point for the wheel. By maintaining proper alignment and smooth rotation, it ensures optimal handling, stability, and control, reducing the risk of accidents.
- Rigorous Testing and Certification
- Our wheel hub bearing undergoes rigorous testing and quality control processes to ensure its performance, reliability, and durability. It meets or exceeds industry standards and is backed by a warranty, giving you confidence and peace of mind in your purchase.

Technical Parameters:

Product Attribute	Value
Product Name	Automobile Spare Parts
Type	Wheel Hub Bearing
Size	Standard
Material	Steel
Country of Origin	China
Warranty	12 Months

Applications:

Enhance the performance, safety, and reliability of your vehicle's wheel assembly by upgrading to our top-of-the-line wheel hub bearing. Our high-quality option offers smooth and quiet operation, improved handling, and increased driving confidence, ensuring a comfortable and secure driving experience.

With a proven track record of durability and longevity, you can trust our wheel hub bearing to perform consistently in all driving conditions. Invest in the best for your vehicle and enjoy the benefits of enhanced performance for years to come.

Support and Services:

Our company provides comprehensive technical support and services for our Automobile Spare Parts product. Our team of experts is available to assist with any questions or concerns regarding installation, maintenance, and repair of our products.

In addition, we offer a variety of services to ensure the optimal performance of our spare parts, including regular maintenance and diagnostic testing. We also provide training for mechanics and technicians to ensure they have the knowledge and skills necessary to properly install and service our products.

Our commitment to quality extends beyond our products and services. We strive to provide exceptional customer service and support to ensure your complete satisfaction with our products and your experience with our company.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years

A large of stock

Professional export company

Accept small order

We can design anything well according to customers' requirment
